## Profile

Hi. My name is Aubrey and I construct functional, responsive, and accessible web design. My professional background working in retail allowed me to cultivate my innovative problem-solving skills and taught me how to create memorable customer experiences. I am an adaptive communicator that strives to create or facilitate an inclusive and transparent environment that removes technical barriers and improves accessibility.

## Skills

HTML5 - CSS3 - JavaScript - React - Git/Github - Accessibility - Responsive Design - Sass - RESTful APIs - Firebase

## Education

### Web Development Certificate, Juno College

June 2021

Graduated from Web Development Immersive Bootcamp.

### Bachelor's Degree, University of Toronto

April 2020

Graduated with a BA (Hons), Environmental Studies and English programs.

## Experience

### Specialist, Apple, Toronto

August 2019 - Present

- Discovered customers' hobbies and passions in order to recommend the optimal hardware/software solutions to fit their needs.
- Collaborated with team members to promote phone upgrades via Canadian cell carriers such as Bell, Telus, and Rogers.
- Encouraged a strong sense of ownership among owners of Apple devices by promoting personalized services such as AppleCare+ and iCloud.

### Mobile & Smart Living Senior Advisor, Best Buy Canada, Toronto

November 2016 - August 2019

- Assisted clients with utilizing in-store/in-home services for devices such as computers, televisions, and appliances.
- Built positive relationships with clients by anticipating needs and providing long-term solutions to technical problems.
- Ranked in the top 3 of 12 stores in the district for mobile phone activation and accessory-attach rates in 2018.

## Projects

### Movies A to Z

[Live](#)  / [Repo](#) 

RESTful API / HTML5 / CSS3 / Paired Programming

A game where users can compare movies based on IMDb user rating scores.

### Surviving Bootcamp

[Live](#)  / [Repo](#) 

Firebase / HTML5 / CSS3 / React

Mental-health themed to-do list that keeps track of projects/goals and due-dates.

### Podcast Prioritizer

[Live](#)  / [Repo](#) 

RESTful API / HTML5 / CSS3 / React / Paired Programming

This app suggests podcasts based on commute times and user search queries.
